

# AERO MEDICAL BAG

**medsurge**   
*technics for life*

## **AERO MEDICAL BAG**

IDEAL FOR EMERGENCY FIRST AID

### **Description**

Aero Medical Bag is the big brother of our first responder bag for your extended basic equipment. Compact, well closed and with a divider in the main compartment.

## FEATURES

### **Shoulder straps included**

The bag for your extended basic equipment, color dayglow yellow, material PAX-plan

You'll have plenty of room for your extended basic gear in the compact emergency food bag. The lid is divided in two and one part closes the main compartment with a separate zipper to prevent items from sliding out. The second part closes with size-adjustable buckles. Behind this part you can store materials in quick access slip pockets and loops. The shoulder strap is included and you can't miss the day-glo yellow closed plastic handle.

### **Well organized with main compartment and two side pockets**

The main compartment provides space for resuscitation bags and accessories. The matching loops allow infusions to be attached. In addition, we have provided the lid and back wall of the emergency meal bag with one row of loops each, as additional loops are always useful. The removable divider in the main compartment allows for neat stowage of supplies and provides stability. Two shallow zippered pockets, each with a row of loops, provide secure storage for such items as venous catheters. The lid pocket provides space for your safety vest. Dressing material or our PAX ampoule XS can be stored in the side pockets. The double-barrel zippers with extension and reflective strips make the bag complete.

Made to be special

We have developed this product especially for the special requirements of rapid deployment groups.

Made to be personal

So that you don't have to do without PAX in your free time, we have also designed products for personal use.

#### **Advantages**
