EYE WASH STATION

Description

Quickly accessible and easy to use eye wash station in orange, for wall mounting or to use as mobile emergency case, with transparent front panel, three bottles ready to use and sterile with ergonomic rinsing head, incl. mirror for easy handling, dustproof, waterproof and space saving, incl. mounting material + eye emergency plan

Special Advantages

In endangered workplaces such as workshops, metalworking stores or chemical laboratories, eye rinsing solutions must be available according to the workplace ordinance §39.

Here GRAMM medical offers a fast accessible, robust and easy to operate eye rinsing station for wall mounting or for mobile use. The comfortable wall-mounted eye wash station offers easy and fast access to the eye rinsing solution, so that in case of emergency a quick reaction is possible.

The station offers space for up to three ACTIOMEDIC® EYE CARE eye wash bottles, which can be combined as required.

A further and very important advantage of our new eye rinsing station is that it can be used flexibly. Mounted on the wall, it is a concrete point of contact for injured persons and thanks to the striking signal color, it is easy to find even with limited vision. As a mobile emergency case, it can also be taken into the danger zone, so that in an emergency, first aid can be given quickly and flexibly directly at the scene of the accident

Easy to grasp

The large handle makes it easy to use even with gloves in an emergency.

Water protected

Integrated mirror

Heated

Optionally also heatable available.

Window

So that it is immediately recognizable whether the eye wash station is filled and ready

Products Parameter

Rinsing time : approx. 15 min (total)

Eyelet wall holder for all GRAMM eye wash bottles

Regulations and standards for eye wash bottles:

GRAMM medical eye wash bottles are CE-certified and comply with DIN EN 15 154-4. Eye washes without water connection and are medical products according to MPG.

Occupational Safety and Health Act §3:

The employer must organize measures for occupational safety and health and provide suitable means to improve safety and health protection in the company. The employees must use the personal protective equipment provided.

Workplace Ordinance § 39:

Depending on the type of hazard (e.g. when handling acids and alkalis) eye rinsing bottles must be available.

Transport of hazardous goods:

Obligation of the forwarding agency to equip each transporter of hazardous goods with a car first-aid box according to DIN 13 164, which is extended by an eye rinsing bottle, safety goggles, etc.

Eye Wash Solution BioPhos[®]74

Eye rinsing for chemical burns - even more gentle on the eye.

New formula:
without exogenous
components

Rapid neutralization:
due to high buffer ca -

Multilingual label:
available in all European
languages

Especially gentle:
pH-neutral and without
preservatives

This is what the press writes about BioPhos74:

New eye rinsing solution allows highly effective treatment.

...The eye rinsing solution BioPhos74 is highly effective and at the same time very well tolerated. As it is adapted to the extracellular electrolyte ratios (sodium-potassium content) of the tissue, secondary cell damage in the eye area is largely reduced.

Source: Extract 8.2011 | 34. Jahrgang | Rettungsdienst | 713

Special Advantages

Did you know?

Your eye is a masterpiece of nature and your most important sense organ. Only the interaction of many small parts in this organ makes SEEING possible. When working with chemicals, they can enter the eye as solid, liquid or gaseous substances. Therefore, eye protection is very important at work! Please have **BioPhos[®]74** ready in case of an emergency in order to quickly and effectively prevent damage to the eye in case of chemical burns.

BioPhos[®]74 works effectively and maintains the cellular electrolyte equilibrium through the exclusive use of natural substances that are subject to physiological metabolism and especially correspond to the extracellular sodium-potassium ratio.
