COMBINATION THERAPY UNIT

Sonicator Plus 941 Combination Therapy Unit

The Sonicator Plus 941 Combination Therapy Unit combines four channels of electrical stimulation with therapeutic ultrasound. The ultrasound stim combo therapy unit comes standard with dual frequency 5 cm² and both a 1 and 3 MHz applicator. Six treatment waveforms include TENS, EMS, Inferential, Premodulated, Russian and High Voltage. The Sonicator Plus 941 Combination Therapy Unit also lets clinicians adjust parameters before or during the treatment.

FEATURES

- Combines ultrasound with electric stimulation
- Features increased utility with multiple stimulation waveforms and dual frequency applicators
- Built in protocols with anatomical library chart
- Offers 50 present programs and memory capability to store your own protocols
- Utilizes an TFT touch panel control
- Optional Treatment Cart

Product Specifications / Dimensions
