PORTABLE RECHARGEABLE PULSE OXIMETER

Edan Medical - H100B Pulse Oximeter

The H100B handheld pulse oximeter from Edan Medical offers accurate, sensitive and reliable measurement of blood saturation and pulse rate. This easy-to-use tool provides spot checks and continuous patient monitoring, and data can be transferred to PC for storage, management, review and printing.

FEATURES

- Includes Adult and Paediatric sensors
- A handheld, easy to use, universal tool for patient monitoring
- Provides a fast and accurate SpO₂, pulse rate and pulse strength measurements on patients from neonates to adults.
- Dual work modes – Provides both long term monitoring and spot checks
- Suitable for hospitals, clinical environments and transport
- Long battery life – Up to 48 hours on 4 x AA disposable batteries or 36 hours on Ni-MH
- Rechargeable Batteries
- Backlight control and Automatic power shut down can be activated
- Ability to review the latest 10 minutes of the trend graph , SpO₂ table and pulse rate
- Pitch tone and Audible and visual alarm capability
- Includes silicon protective boot
- Optional: Ability to transfer up to 300 hours of SpO₂ data to a for storage data management, review or printing with purchase of Data Management Kit
- Optional: Rechargeable Ni MH rechargeable Battery with Charging Station

SPECIFICATION

- Dimensions: 16.0cm x 7.0cm x 3.7cm
- Weight: 165g without batteries
- Power Supply: 4 x AA Alkaline Cell Batteries or Ni-MH Rechargeable Batteries
- Average Battery Time: 48 continuous hours with disposable batteries or 36 hours on Ni-MH Rechargeable Batteries
- Pulse Rate Range: 25-300 BPM
- SpO2 Range: 0%-100%
- Storage Options: Bed rail mount, carry bag, charging stand
