INSTITUTIONAL FIRST AID KIT/BASIC LIFE SUPPORT KIT

IDEAL FOR EMERGENCY FIRST AID

Description

A compact and easy to carry bag, that is quick to open in emergencies and easy to close. The VIP First Responder Bag is water resistant and durable making it ready for ANY emergency situation.

The VIP first Responder is specifically designed to accommodate all the basic equipment for first aid, with various compartments and outer zipper pockets for maximum storage & capacity. A comfortable bag with carry handle and shoulder strap, which are included as standard, designed to make transport over all terrain-types easier.

An ideal bag for first responders, paramedics, search & rescue teams and first aiders. Suitable for transportation by foot and by vehicle.

Innovative design for a first aid bag.

Made from PAX-Plan, the VIP First Responder Bag is easy to wipe clean and keep clean with its polyester fabric and lacquered TPU finish. Tired and tested in the lab and "on the job" in the field. An ideal outer material for professional use of emergency bags.

Maximum storage & capacity.

Simply attach the module bags as and when required and in any position using the secure velcro strips inside the bag to maximise storage.

The VIP First Responder Bag is equipped with a separate zipper that lifts the main opening lid of the bag away, to allow clear and easy access to the main compartment - this area can store larger consumables such as sterile water, resuscitation masks & other accessories. The side pockets are ideal for storing dressings & bandages.

Technical information:

Compact and reinforced VIP First Responder emergency bag

Made from polyester fabric with lacquered TPU coating

Maximum storage with several outer pockets two side pockets
