

Biohazard Spill Kit

Biohazard Spill Kit

Description

Multiple use kit with tools and PPE for safe clear up and disinfection of up to 10 biohazard spillages. SoChlor™ NaDCC chlorine release absorbent granules absorb spillage, kill pathogens on contact and reduce cross contamination risk. SoChlor™ TAB chlorine tablets dilute to produce 10,000ppm concentration chlorine disinfectant solution fully effective against blood borne pathogens and Tuberculosis(TB). Multi kit suitable for large areas / locations where the risk/incidence of biohazard spillages is high. Intended for use in busy emergency rooms, larger departments and other similar situations where the risk and frequency of biohazard spillages is high.

Staff are provided with protective aprons and gloves with sufficient quantity of tools to perform frequent effective and rapid clean-ups. Contain all required Personal Protection Equipment (PPE). Used throughout the NHS in hospitals, clinics, surgeries, laboratories and ambulances; dental and veterinary practices; nursing and care homes, schools, offices, businesses, ships, aircraft etc. GV Health Spill Packs and Kits hold the NHS Supply Chain contract for biohazard clear up. Safe for use by non-specialist staff and first aiders. Refill items can be purchased separately.
