

# RHINO RESCUE

## Splint Universal

## **RHINO RESCUE Splint Universal**

### **Product Description**

The Rhino Rescue Splint consists of a thin core of aluminum alloy between two layers of foam, making the universal splint flexible and dimensionally stable at the same time. It is a reusable universal splint for immobilization of bone fractures and other injuries. The universal splint is made of a thin aluminum alloy core between two layers of foam, this makes it flexible, dimensionally stable at the same time and this allows the splint to be bent and folded in any direction.
