

# RHINO RESCUE

## Triangular Bandage

## **RHINO RESCUE Triangular Bandage**

### **Product Description**

RHINO RESCUE triangular bandage is a type of medical bandage that is shaped like a large triangle. It is a robust triangular bandage made of 100% viscose according to DIN 13168 for the fixation of bandages and for short-term immobilization of the forearm. It is often used in first aid to immobilize and support injuries such as fractures, sprains or dislocations. Triangular bandage can also be folded into a sling to support an injured arm. They are a versatile first aid tool and can serve various purposes in emergency situations.

The RHINO RESCUE triangular bandage is a latex-free, non-adherent woven polyester bandage with two (2) stitched reinforcement seams and high-strength polyester locking stitch.

Its generous 45 in. x 45 in. x 63 in. size can be used as a triangular bandage, swathe, sterile field dressing and sling, among others.

## Product Benefits

RHINO RESCUE triangular bandage is a universal aid, its primary task is to immobilize arm injuries / fractures or hand injuries / fractures. Furthermore, the Rhino Rescue Triangular Bandage can be used to immobilize other bandages.
