Made for Decisive Moments

SELF-LOADING STRETCHER WITH SPINAL BOARD HOUSING

CARRERA PRO

DESCRIPTION

Carrera Pro is a lightweight self-loading stretcher with a spinal board housing. This stretcher is the perfect solution when you are short of space in your ambulance or lack an additional pair of hands to carry a spine board. *Spine board not included.

FEATURES

- **SPINE BOARD HOUSING**

Thanks to CARRERA PRO configuration, the spinal board can be placed in a dedicated housing located under the patient board.

- **T + REVERSE T SETTING**

The board of CARRERA PRO can assume the Trendelenburg position to help patients affected by poor circulation or other symptoms.

- **HIGH-DENSITY POLYETHYLENE BOARD**

The CARRERA PRO board is constructed of high-strength materials to increase its durability and facilitate sanitisation. The board is designed with unique features, such as 2 openings to attach Spencer's anatomic headrest, pins to fasten any mattress, eyelets to host DNA rewinding restraining straps and molded footrest for better containment.

- **ENHANCED STABILITY WHEN LOADED**

The frame is designed to distribute the load weight efficiently across the entire structure, preventing tip over accidents. A crash-assist mechanism enhances absorption areas whilst the low centre of gravity increases stability on all types of terrain.

- **RECLINING SAFE BARS**

Side bars twist 180° with a double control button placed outside the patient's reach. This unlocking mechanism provides added security to patients overtaken by panic attacks, whilst avoiding any fingers jamming injuries.

Technical data

- Length: 1970 mm
- Width: 570 mm
- Weight: 37 kg
- Material: Stainless steel, Al, PE
- Board colour: Black
- Frame colour: Chrome
- Load capacity: 170 kg
- Wheel diameter: 200 mm
- Brakes: Posterior
- Loading height: 500 mm
- Code: CA60151
